[video: http://youtu.be/mrKPisD7H0U]

TOOLS:

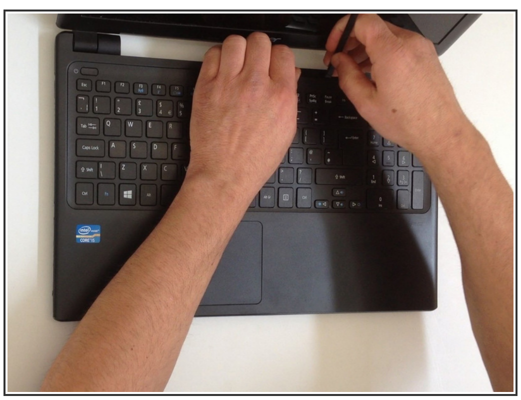

- Phillips #0 Screwdriver (1)
- Spudger (1)

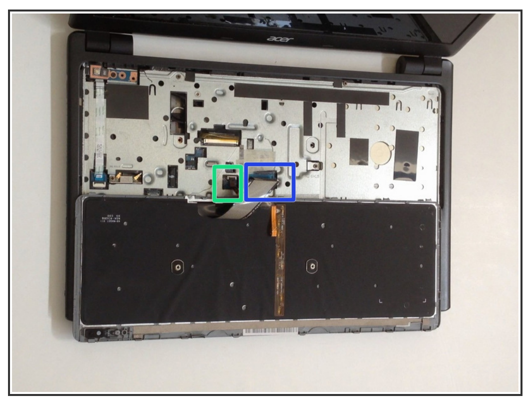

Step 1 — Keyboard

- Turn off the laptop and remove the battery.
- Remove two screws securing the Keyboard.
- The Keyboard is held by two locking clips, under the battery. Use the sharp tip of a plastic tool to release the keyboard.

Step 2

- Remove the Keyboard and disconnect the two flex cables:
  - Keyboard flex cable
  - Keyboard Light flex cable
